the system failures

The Five Foundations of 'the new promise'

Family

Voice

Children must be listened to and meaningfully and appropriately involved in decision-making about their care, with all those involved properly listening and responding to what children want and need. There must be a culture of listening and responding.

People

Where a family is not possible, children must stay with their brothers and sisters where safe to do so and be able to return to a loving home, staying there for as long as needed.

Scaffolding

Children, families and the workforce must be supported by a system that is there when it is needed. The scaffolding of help, support and accountability must be ready and responsive when it is required.
